

Scientific Research meets Industry Experience

Arcadias-Conference 2026

Idea

This conference has a dual focus: maintaining scientific standards while actively involving industry experts. Too often, scientific research remains within the research bubble and fails to reach practice. Through a structured exchange between academia and industry, the conference enables research to move beyond traditional boundaries, **generating richer empirical insights and real-world impact**, while fostering lasting research collaborations beyond the event.

Academic & Industry Impact

Academic Value & Opportunities:

- **Roundtables with leading companies, industry experts, and partner institutions**
- **Strong publication support:** METAS Journal (*Modern Economic Trends and Science*), proceedings, book of abstracts, best paper awards, and certifications
- **Workshops** on Future Trends (AI & ESG), Strategic Management, and Agile Excellence
- An **exclusive industry network** supporting future research (e.g deep expert interviews)

Industry Value & Opportunities:

- Direct access to high-potential talent and impactful **research collaborations & networking**
- **Cross-industry partnerships and innovations** enabled by focused company exchange
- Insights into **emerging trends with research-driven solutions** for business challenges

Call for Papers

Inviting high-quality academic and industry-relevant research contributions as full papers, abstracts, posters, and presentations. No length limits apply; APA and Chicago styles are accepted. All submissions undergo a double-blind peer-review process. **Deadline: 1st June '26.**

Information

Time & Place: 22nd - 26th June in Tokyo, Germany or Online (more places might be added)

Committee: The international conference committee is composed of senior researchers and industry experts to ensure applied research results. It's headed by Dr. Samuel Bednarek (DBA).
